12th EMS Annual Meeting & 9th ECAC

10 – 14 September 2012

Łódź, Poland

Ildikó Pieczka

Eötvös Loránd University, Budapest, Hungary

2012

My participation on the 12th EMS Annual Meeting & 9th ECAC in Łódź, Poland has been supported by the European Meteorological Society through a Young Scientist Travel Award. I would like to thank to the Committee for giving me this opportunity.

Thanks to the award I have received, I have been able to present a work entitled “21st century climate assessment for Hungary using different future pathways” at the session “UC2 – Climate prediction and scenarios from season to century”.

The main topic of the conference was “European Climate Services Capabilities – user needs and communication with stakeholders” which I felt relevant to my scientific work. I also listened to presentations in other sessions to broaden my knowledge in different fields of meteorology.

During the conference I had the chance to meet several people interested in similar research topics as mine which resulted in lively discussions. Thanks to local friends we also had a nice and interesting tour in the city of Łódź.

Finally I would like to thank once again for the opportunity to participate on the conference.

Budapest, September 2012
